

A Pragmatic Philosophy for Pragmatic Programmers (SSEers)

ENSE 281 with Tim Maciag

University
of Regina

FACULTY OF ENGINEERING
& APPLIED SCIENCE
Software Systems Engineering

Outline

- Personal character
- Stone soup and boiled frogs
- Knowledge portfolio
- Communicate!

About being pragmatic – A refresher (271)

- A commitment to quality
- An active agreement
- Accepting responsibility
- Honesty & integrity

Provide
options, not
excuses

Intelligence & humility

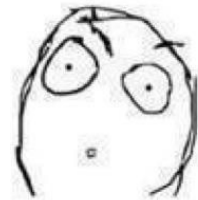

- The best programmers know they don't know it all
 - “Most programming is an attempt to compensate for the strictly limited size of our skulls” (Dijkstra, 1972)
- Continuously learn

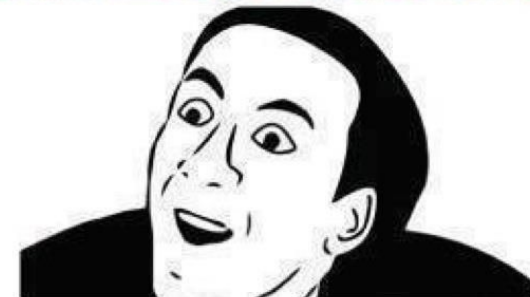

Intellectual honesty

- Refusing to pretend to be an expert
- Admitting mistakes
- Clearly understanding your program, not compiling it to see if it works
- Providing realistic goals, report-outs/updates, estimates
 - Holub on estimates: <https://www.youtube.com/watch?v=QVBlNCTu9Ms>

Hey, can I be
honest with you?

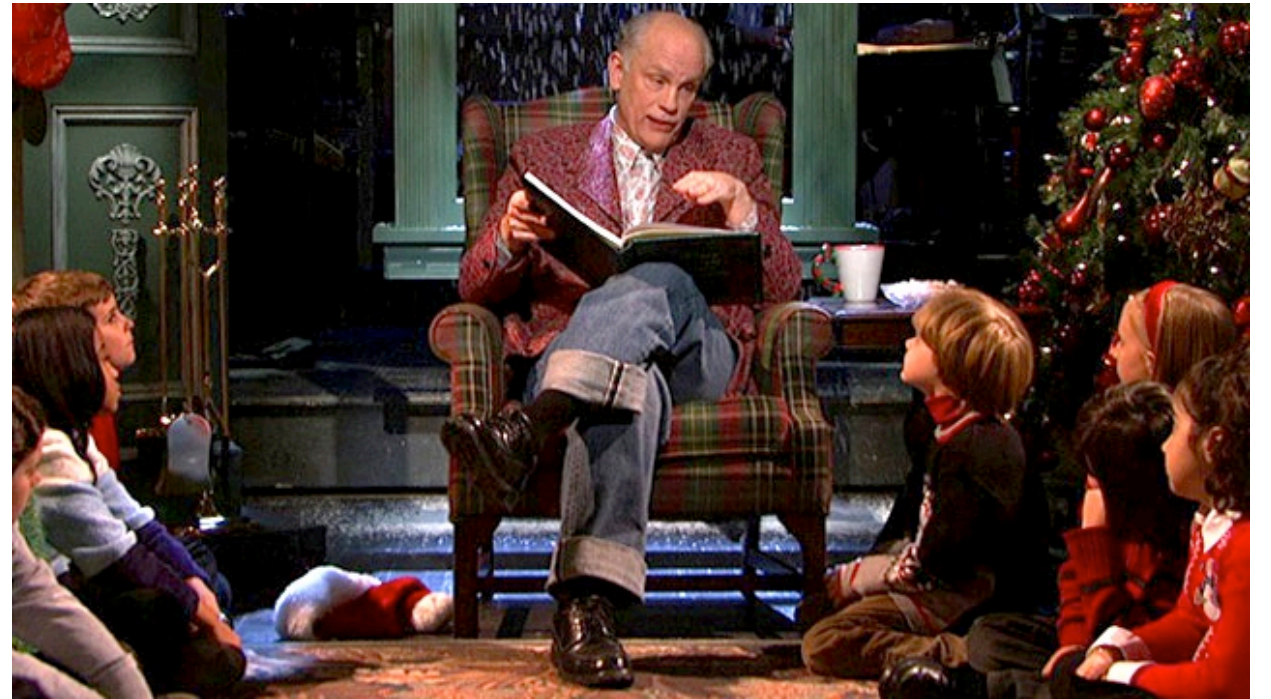

NO, PLEASE LIE TO ME!

Stone soup

- Story time with Tim!

Stone soup

- Story time with Tim!
- Morals of the story

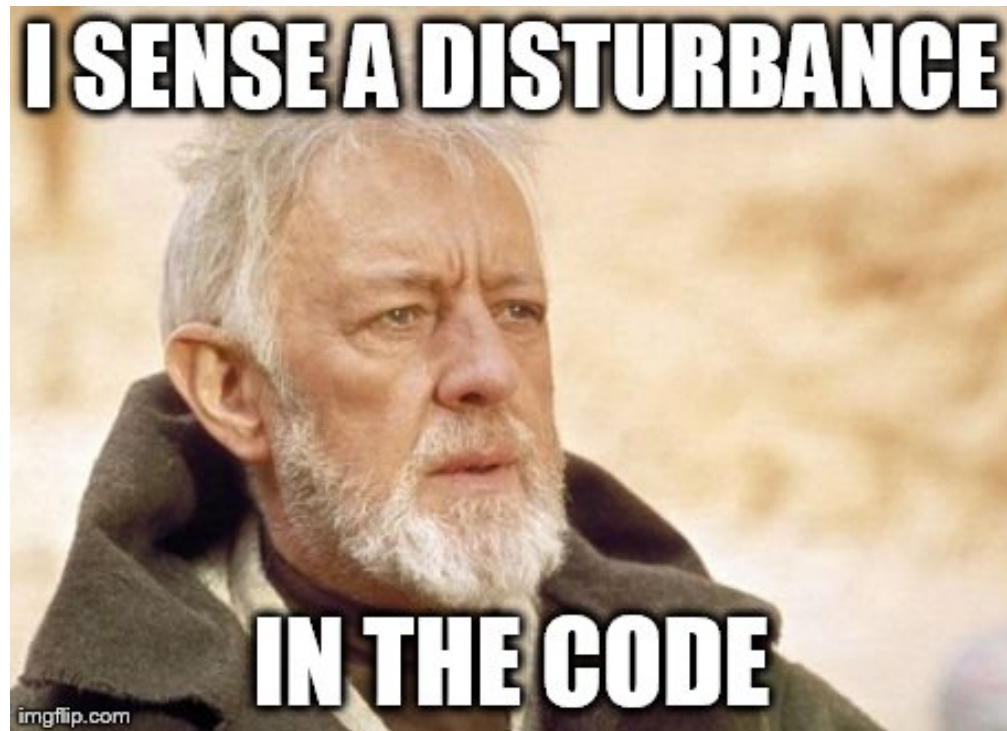

Stone soup

- Story time with Tim!
- Morals of the story
- Remember the big picture

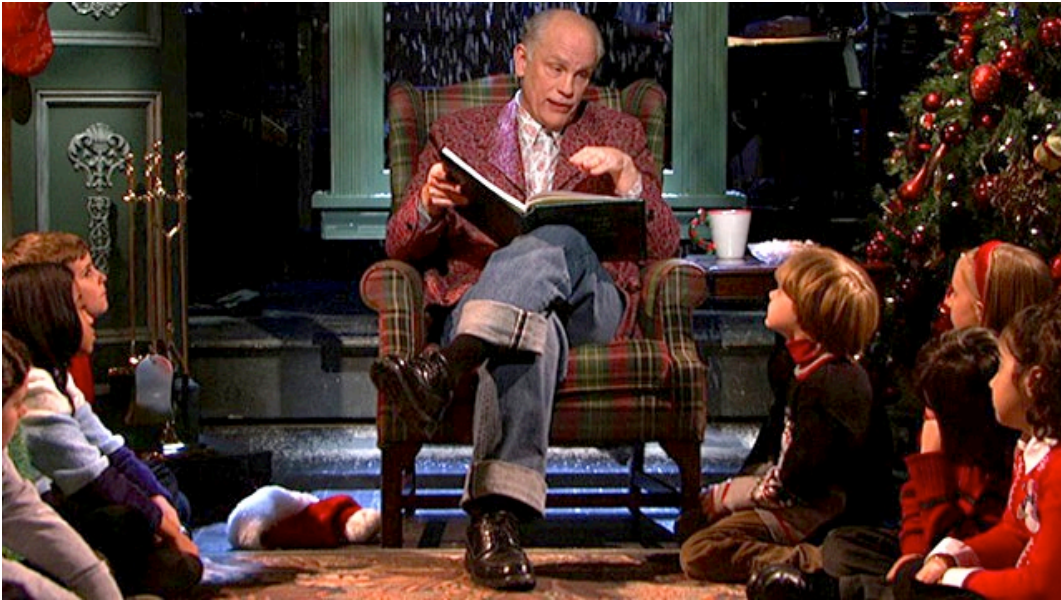

Beware of boiling frogs

- Entropy

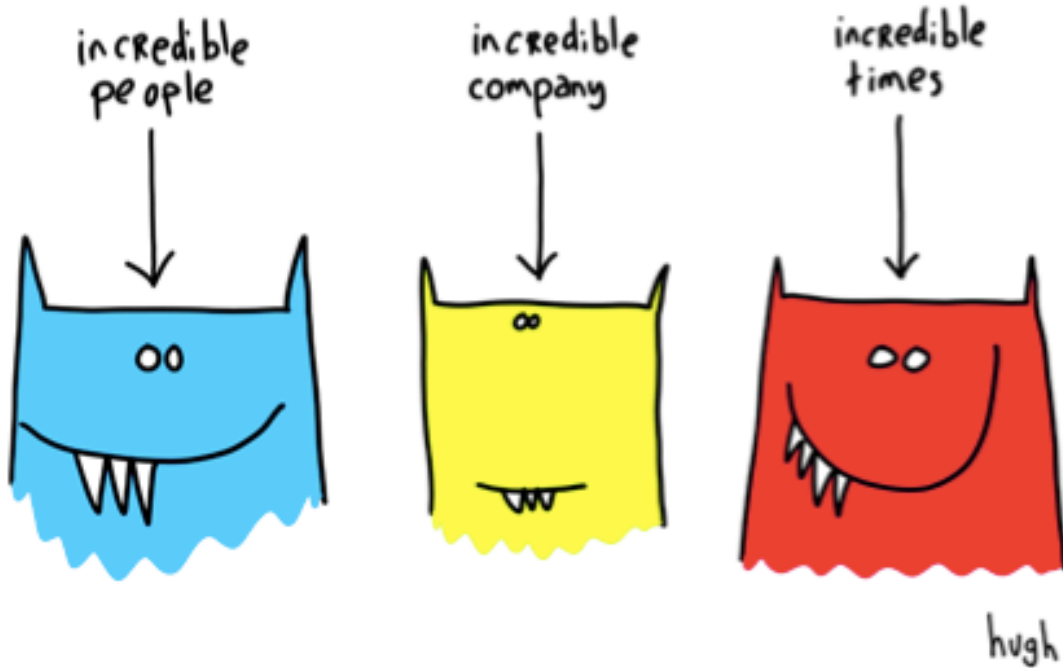

Beware of boiling frogs

- Entropy
- Boiling frogs

Beware of boiling frogs

- Entropy
- Boiling frogs
- So: Don't live with broken windows

People before bits and bytes (ah, 271!)

- False-consensus effect
 - <https://youtu.be/TewiUcN35Yo>
- Make quality, from the user's perspective, paramount

Developer watching videotape of usability test.

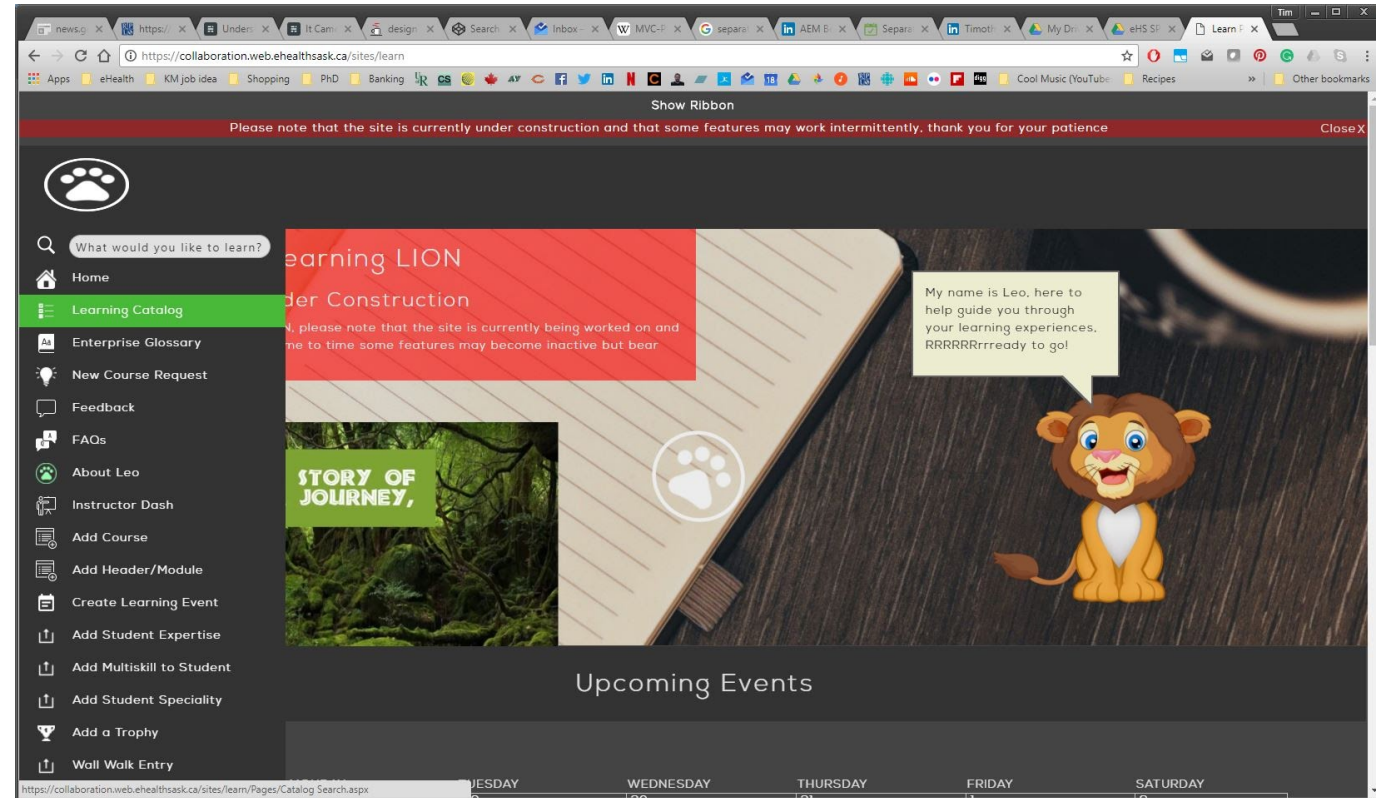

People before bits and bytes (ah, 271!)

- False-consensus effect
 - <https://youtu.be/TewiUcN35Yo>
- Make quality, from the user's perspective, paramount
- Know when to stop
 - My curse, re: my art
 - eHealth LMS
 - Inspired by [Pluralsight](#)

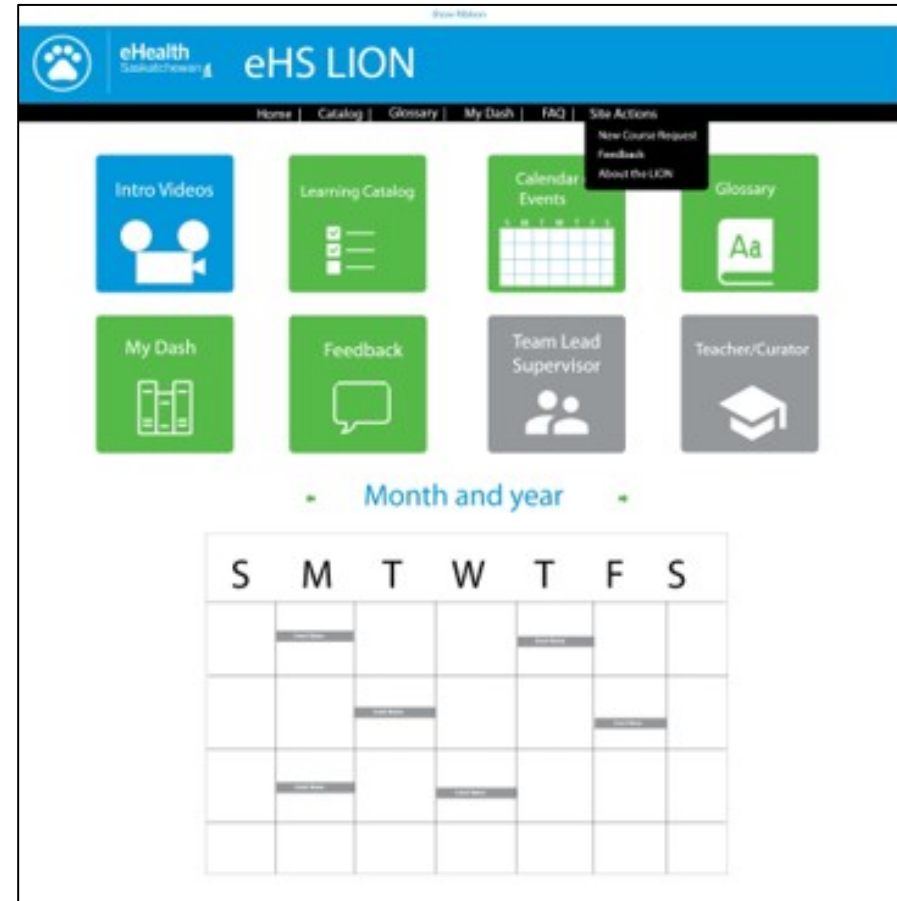

People before bits and bytes (ah, 271!)

Build your knowledge portfolio

- Your knowledge is an “expiring asset”
- Curiosity of spirit
- Build a stronger (broader) awareness of the design & dev process

Moar on *building* knowledge!

- Read

Moar on *building* knowledge!

- Read
- Analyze before acting

Moar on *building* knowledge!

- Read
- Analyze before acting
- Things to do
 - Learn a new language every year
 - Read a technical book each quarter
 - Just read (currently reading “The Guncle”)
 - Take classes
 - Participate in local user groups (IEEE, SharePoint, LOSURS – and not just technical ones!)
 - Experiment with different enviros (Linux, Mac, Win)
 - Stay current

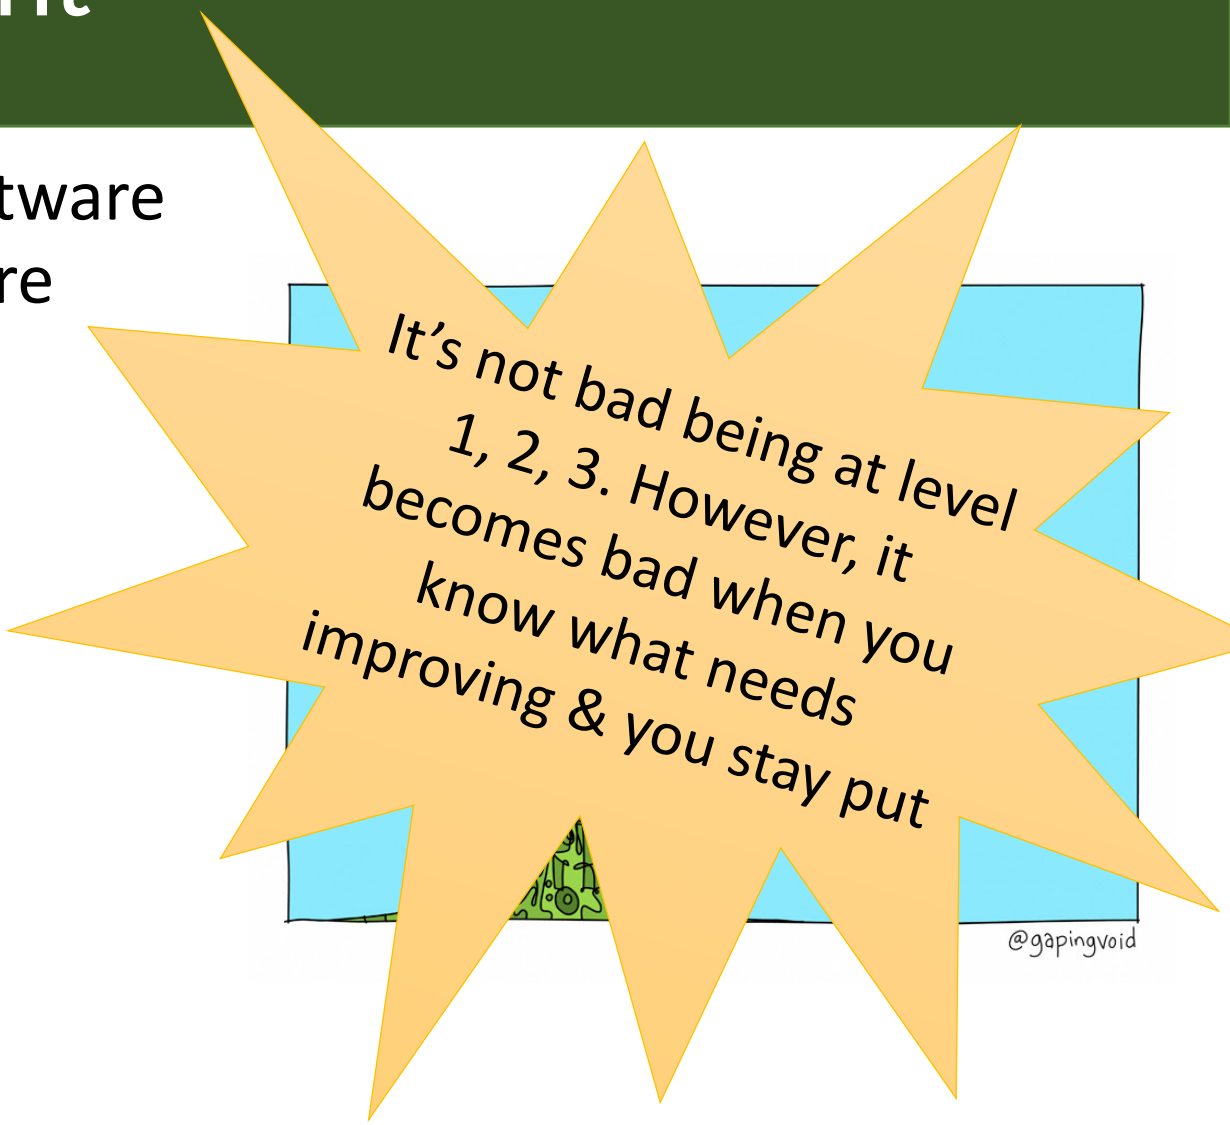

Professional development

- Making the commitment to be a software engineer /software designer/software programmer / software *gardener*
- Level 1: Beginning
- Level 2: Introductory
- Level 3: Competency
- Level 4: Leadership

Professional development

- Making the commitment to be a software engineer /software designer/software programmer / software *gardener*
- Level 1: Beginning
- Level 2: Introductory
- Level 3: Competency
- Level 4: Leadership

It's not bad being at level
1, 2, 3. However, it
becomes bad when you
know what needs
improving & you stay put

@gapingvoid

Professional development

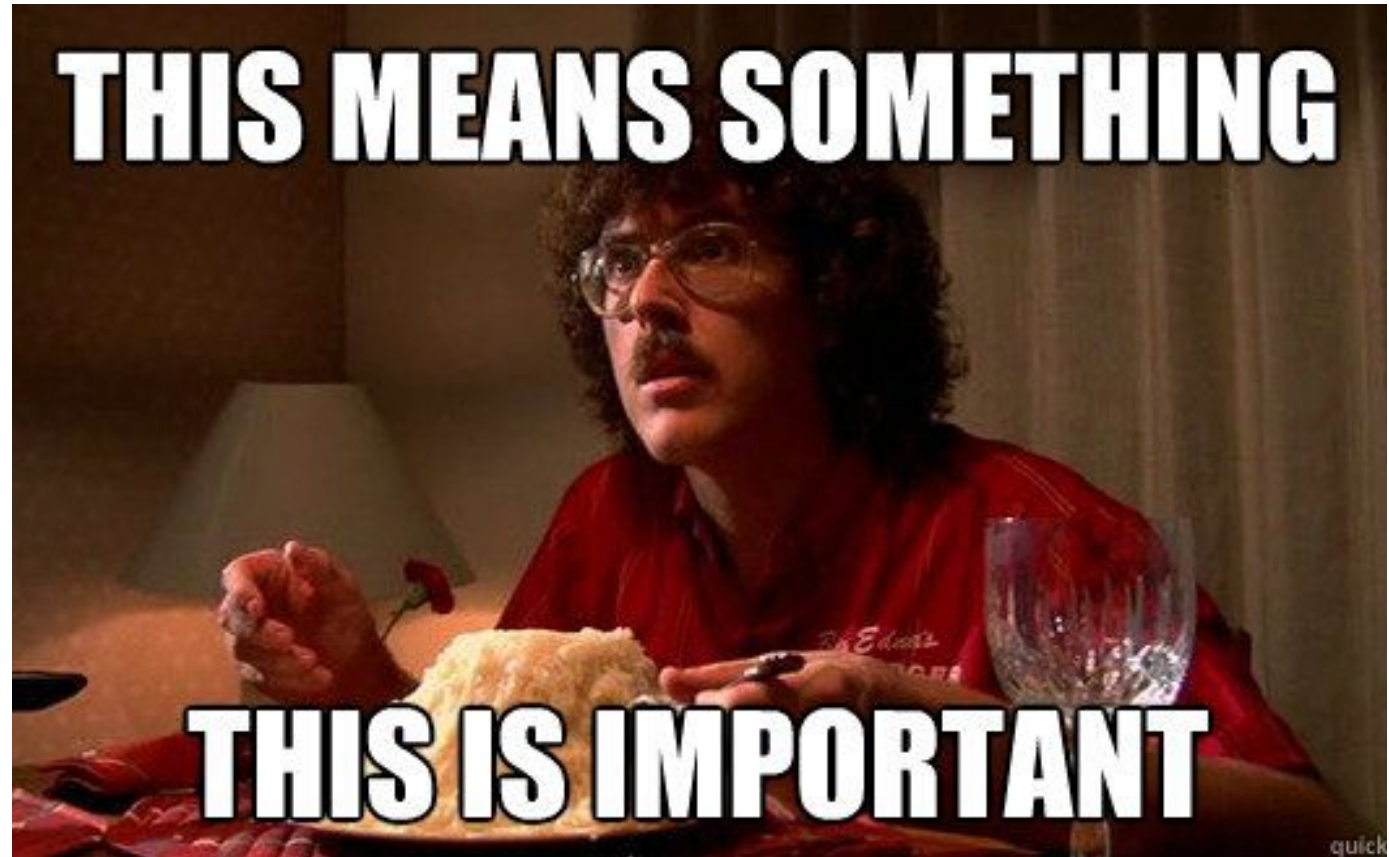

- Making the commitment to be a software engineer /software designer/software programmer / software *gardener*
- Level 1: Beginning
- Level 2: Introductory
- Level 3: Competency
- Level 4: Leadership

A note
about
linearity!

It's not bad being at level 1, 2, 3. However, it becomes bad when you know what needs improving & you stay put

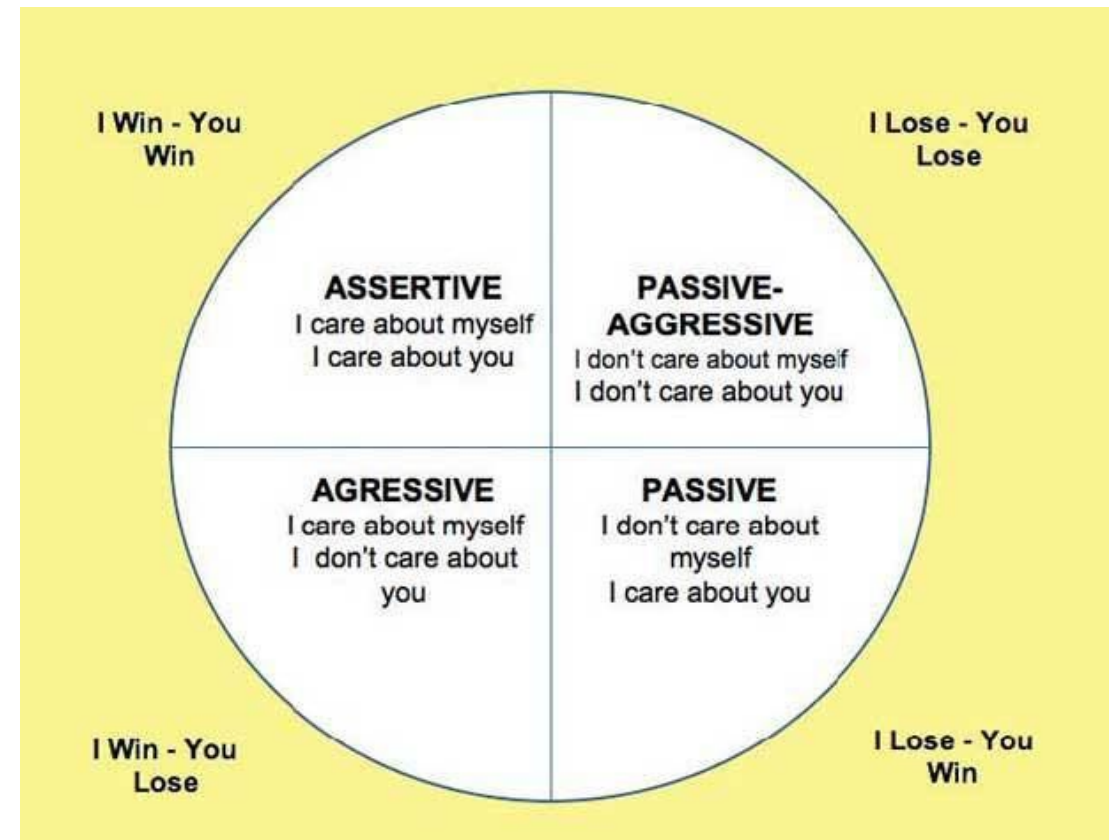

PPT it up! – No, not a PowerPoint file!!

- People
- Process
- Technology

Communication

- Know what you want to say
- Know your audience
- Choose your moment
- Choose a style
- Make it look good
- Involve your audience
- Be a listener
- Get back to folks

Communication

- Know what you want to say
- Know your audience
- Choose your medium
- Choose a style
- Make it look good
- Involve your audience
- Be a listener
- Get back to folks

Software Engineering
is a social effort!
